

V.E.R.NE. project

"Vocational Education for European Routes NETWORKS"

verne-project.blogspot.com

V.E.R.NE.

V.E.R.NE. is a Leonardo da Vinci Partnership project. The main goal of the project is to develop a specialised training initiative within the "European Routes Network": a web of cultural and historical itineraries intersecting all regions of Europe. The main target group are employees and entrepreneurs working in the production and service sectors linked to European Routes of partner countries. The project focuses on improving inadequate skills and knowledge of this group with the view of enhancing economic development of regions and improving employability.

Aims, activities and results:

-Identification of trade sectors in the EU partner territories

-Identification of skill gaps relevant to itinerary infrastructures

-Audit of ongoing vocation and education programmes (addressed to provide skill qualifications in trade sectors)

-Formulation of customised VET courses
